DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11 and 13-16, drawn to a method of indexing the video storage media using data derived from the content combined with position data.

Group II, claim(s) 17-20, drawn to a recorder having means for detecting a power on status of the recorder by detecting presence or absence of a signal.

Group III, claim(s) 21-22, drawn to a free recording space determination.

Group IV, claim(s) 24-27, drawn to relating to the display content of different sources.

Group V, claim(s) 28, drawn to a recorder using subtitle or caption for identifying a scene of video content.

The inventions listed as Groups I, II, III, IV and V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I does not require means for detecting a power on status of a recorder by detecting presence or absence of a signal, or a free recording space determination, or controlling relating to the display content of different sources, or subtitle or caption for identifying a scene of video content.

Group II. does not require a method of indexing the video storage media using data derived from the content combined with position data, or a free recording space determination, or controlling relating to the display content of different sources or, subtitle or caption for identifying a scene of video content.

Group III. does not require a method of indexing the video storage media using data derived from the content combined with position data, or a recorder having means for detecting a power on status of the recorder by detecting presence or absence of a signal, or controlling relating to the display content of different sources, or using subtitle or caption for identifying a scene of video content.

Art Unit: 2616

Group IV does not require indexing the video storage media using data derived from the content combined with position data, or a recorder having means for detecting a power on status of the recorder by detecting presence or absence of a signal, or a free recording space determination, or using subtitle or caption for identifying a scene of video content.

Group V does not require indexing the video storage media using data derived from the content combined with position data, or a recorder having means for detecting a power on status of the recorder by detecting presence or absence of a signal, or drawn to a free recording space determination, or controlling relating to the display content of different sources.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Faile can be reached on (571) 272-7375. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
